

I urge the FCC to restore the Fairness Doctrine and the limits on number of media outlets that can be owned by one person or company. The unlimited ownership regulations (or lack of regulations) are damaging to our country and democracy. Concentration of media ownership is not in the best interests of our citizens, as it limits the number of viewpoints that can be heard. Some of the media networks and conglomerates are using their power to subvert free debate. Local content should be increased, not decreased on our TV and radio stations. Thank you.
